AMENDMENTS TO THE SPECIFICATION

Please amend the specification as follows:

Please replace the paragraph beginning at page 4, line 2, with the following amended paragraph:

"BRIEF DESCRIPTION OF THE DRAWINGS

FIG. 1 illustrates one embodiment of the self-inflating article of the present invention.

FIG. 2 illustrates a cross section embodiment of the self-inflating article of the present invention.

FIG. 3 illustrates another a cross section embodiment of the self-inflating article of the present invention.

FIG. 4 illustrates another a cross section embodiment of the self-inflating article of the present invention.

~~FIG. 5 illustrates a container with a cover for a plurality of self-inflating articles of the present invention.~~

~~FIG. 6 illustrates a container with a cover for a plurality of self-inflating articles of the present invention."~~

Please replace the paragraph beginning at page 6, lines 22, with the following amended paragraph:

"FIG. 1, FIG. 2, FIG. 3, and FIG. 4 illustrate embodiments of the self-inflating article of the present invention. FIG. 1 shows the self-inflating article 1 of the present invention with a bonding site 24. FIG. 2, FIG. 3 and FIG. 4 show a cross-section of the self-inflating article which comprises inflatable bladder 7, which can comprise a substrate comprising a first layer 10 and a second layer 12. The present invention comprises at least one rupturable reservoir 2 which may contain a gas evolving composition 4 that can be either wet or dry and is preferably located within a sack 8 of the inflatable bladder 7.

Customer No. 27752

The rupturable reservoir 2 may also comprise a gas evolving composition 5 interior to the rupturable reservoir 2. In the FIG. 2, the rupturable reservoir 2 illustrates that the rupturable reservoir 2 can be an entity unto itself formed by peripherally joining two flexible walls along seams and can be free to the interior of the inflatable bladder 1. The rupturable reservoir 2 can be adhered to one of the layers that form the sack 8 of the inflatable bladder 7. In an additional embodiment of the present invention shown in FIG. 3, one of the walls of the rupturable reservoir 2 can exist as the first or second layer of the inflatable bladder 1. FIG. 4, depicts a personal care composition 6. FIG. 5 illustrates a container 18 with a cover 20 for a plurality of self-inflating articles of the present invention. FIG. 6 illustrates a container 18 with a cover 20 and shows the removable seal 22 that is removed prior to first use of the article 1. The container 18 has a cover 20 wherein the cover 20 protects the products not in use."
